

## Level 2 NVQ Diploma In Performing Manufacturing Operations (QCF)

### Objective

The qualification is aimed at any individuals working in a Manufacturing environment. It is an accreditation of the competence, skills and knowledge measured against National Occupational Standards.

The awarding body is EAL (**Excellence, Achievement & Learning Limited**)

**The PMO NVQ is made up of 2 mandatory units and 4 job specific units:**

- **Unit 001:** Complying with statutory regulations and organisational safety requirements
- **Unit 002:** Promoting effective working relationships
- Four job specific units chosen around job specific duties
- We can also build into the NVQ any client specific units of assessment requirements

### Our Approach

The Assessor will work with groups of learners or on a one-to-one basis to complete the qualification. The Assessor will be responsible for assessing, supporting and mentoring the learners. We ensure that the Assessor has a manageable caseload of work at any one time.

### Delivery Schedule

The learner will complete the following delivery schedule:

- Initial induction (includes enrollment)- approximately 4 hours off the job
- Three work based assessments- typically 10-12 hours of individual assessments in total
- There is minimum disruption during this activity
- Upon successful completion of this activity we can apply for certificates for the learners

### Quality Assurance

To ensure the quality of delivery the Internal Quality Assurer will visit the Assessor during the process and also sample learner files upon completion. The External Quality Assurer may also visit on behalf of the Awarding Body (EAL).

### Benefits Of The NVQ

NVQs can enhance job opportunities, increase the feeling of self worth and give you a nationally recognised certificate of competence in the area of your work.
